

OfferCheck — AI Coding 赛道作品提交

💡 **OfferCheck — Job Offer Due-Diligence Agent**: 面向海外求职者的「怀疑型研究管家」。

粘贴 offer / JD / 公司名 / 招聘方消息或截图，Agent 主动联网独立调查这次具体机会，主动找反证，输出三态裁定 **Looks Legit / Suspicious / Likely a Scam** + 可点击溯源的证据链 + 待确认事项——在「转账 / 交押金 / 发送敏感信息」之前，把不可逆损失拦截在发生前。

覆盖求职全链路四阶段（选岗调研 → 简历定向 → 沟通证伪 → offer 证伪），同一自主调查引擎、跨阶段记忆携带、追问自动路由；no evidence, no verdict——每条结论都绑定真实检索到的证据。

一、基本信息

团队成员：王耀中

作品名称：**OfferCheck — Job Offer Due-Diligence Agent**（求职机会证伪副驾）

二、作品介绍

产品体验链接

体验链接：<https://offercheck.up.railway.app/>

开源仓库链接（GitHub）：<https://github.com/yaozhongai/OfferCheck>

快速体验（30 秒上手）： 打开链接后可直接粘贴以下任一示例发起调查（单次完整调查约 1-2 分钟，期间可实时观看 Agent 的调查轨迹）：

- 诈骗样例： I received a job offer claiming to be from Apple. The email came from [apple-hiring-team.com](#) and they asked me to pay a \$200 background-check fee via gift cards before onboarding. Is this legit?
- 正常样例： I got an offer from GitLab for a Senior Backend Engineer role. The email came from an [@gitlab.com](#) address and the compensation matches levels.fyi. Can you verify this opportunity?

产品概述

OfferCheck 是面向海外求职者的「怀疑型研究管家」：粘贴一份 offer / JD / 公司名 / 招聘方消息 / 截图，Agent 主动联网**独立调查这次具体机会**，输出三态裁定 **Looks Legit / Suspicious / Likely a Scam** + 红旗证据链 + 待用户自行确认事项。

创新点与差异化：

- **主动证伪，而非静态打分**：竞品（JobScamScore、Scamio 等）只做公司实体的静态信用 verdict、不给证据；OfferCheck 对「这次具体机会」做主动、多源、持续证伪——直击「冒名顶替真公司」这一最高频诈骗模式（伪造 offer / 仿冒域名邮箱 / 冒充 HR），且每条结论附可点击溯源的证据链。
- **反幻觉接地层（no evidence, no verdict）**：四层纵深防御——接地铁律 prompt → 强制取证 gate（零检索禁止裁定）→ 结构化终止工具 submit_verdict → AIS 来源对账（引用的 URL 逐条核对是否真实访问过，臆造来源标记 ⚠️ 未验证）。安全类产品的可信度即产品力。
- **全链路副驾，同一引擎**：选岗调研→简历定向→沟通证伪→offer 证伪四阶段共用一个自主调查引擎（不同 stage prompt），跨阶段记忆自动携带、单一对话内追问可自动路由到其他阶段能力——对比 Jobright/JobCopilot 等全链路效率工具防骗环节薄弱（**第三方 72 小时实测**：自动投递不筛查岗位来源，数据收割型假岗位绕过审核、用户收到与投递直接关联的钓鱼邮件）。

商业化潜力

- 安全类工具付费意愿高于效率类
- 单次免费证伪引流 → 求职季订阅（多次证伪 + 简历定向 + 选岗调研）
- B 端向留学中介 / 高校就业办输出批量核验
- 沉淀诈骗话术与山寨域名黑名单形成数据壁垒

产品面向哪个海外市场、哪些目标用户及他们有哪些核心痛点？

市场： 以北美（美国/加拿大）英语求职市场为主，兼顾欧洲与新加坡；全英文产品界面。

目标用户：面向海外/远程岗位求职的学生与早期职业者——留学生、应届生、远程工作求职者、跨境求职的开发者。他们是求职诈骗的最高发受害群体：缺乏面试经验、急于拿 offer、对仿冒域名和异常招聘流程不敏感。

核心痛点与真实需求依据：

- 
- 2025 年美国求职者调查 ([PasswordManager.com](#))：**58% 的求职者在线上遇到过虚假招聘信息**，约四分之一曾实际中招（泄露密码/个人信息或损失钱财），远程岗与跨境求职是重灾区；
 - AI 让诈骗更难肉眼辨别：据 [FBI IC3 年度数据](#)，就业类欺诈投诉一年内暴涨 276%（超 2 万起）；行业监测显示深伪（deepfake）欺诈尝试 2024 年增长约 13 倍——伪造招聘官视频、伪造 offer letter、仿冒企业域名邮箱正在快速普及；
 - 美国 [FTC 官方数据](#)：求职诈骗报告损失 2020→2023 翻了三倍，仅 2024 上半年即超 **2.2 亿美元**；「任务型」线上求职诈骗报告量一年内翻了四倍。FTC 同时指出绝大多数诈骗从未被报案，实际损失远高于此；
 - 现有工具两头缺位：防骗类只给单点 verdict 不给证据、不覆盖求职全程；求职效率类全链路但防骗形同虚设。

产品如何解决上述问题，并体现出海落地价值？

核心功能——求职全链路四阶段，同一引擎不同输入：

阶段	输入	Agent 自主做什么	输出
① Role Research 选岗调研	公司/岗位 + 个人背景	查业务真实性、融资健康度、团队背景、僵尸岗	优先级建议 + 依据
② Resume Fit 简历定向	JD + 简历（支持 PDF 上传）	定位差距，给「这几点突出 / 这几点补」	定向修改清单（附依据）
③ Message Check 沟通证伪	招聘方消息 / 聊天截图	核实身份、检测异常沟通（预付款/无面录用/紧迫感）	红旗清单 + 建议
④ Offer Verification（核心）	offer/合同 + 全程上下文	最深度交叉验证、主动找反证	三态裁定 + 证据链 + 待确认项

使用流程：选择阶段（或直接自由输入）→ 粘贴文本 / 上传截图或 PDF → 实时观看 Agent 调查轨迹（查了什么、为什么）→ 获得裁定卡 + Evidence Board 证据面板（红旗/事实/来源可点击溯源）→ 对话式追问（追问可自动路由到其他阶段能力）。

本地化设计：全英文界面与交互；调查信源为海外生态（WHOIS 域名注册、Crunchbase 融资、LinkedIn、Glassdoor、官方 careers 站、英文媒体报道）；诈骗模式库对准海外高发手法（gift card

费用、超额支票、WhatsApp/Telegram 招聘、USDT 押金）。

预期价值：在「转账 / 交押金 / 发送敏感信息」之前给用户一次独立、多源、有证据的核查，把不可逆损失拦截在发生前。

产品技术架构是怎样的？

OfferCheck 技术架构

- **nexa_agent/ 核心引擎 (headless)：**ReAct 原生 function-calling 内循环 + Reflexion 外循环 (Trial→Evaluate→Verify→Reflect) + Verifier 事实核查网关 (CoVe 逐条核查) + Evaluator (stage-aware) + Eval Harness + 12 个工具 + 可插拔搜索层 (Tavily→SearXNG→Exa→DuckDuckGo 降级 + 熔断) + 模型分层路由 + trace 事件钩子。
- **offercheck/ 场景层：**四阶段 stage prompt + 裁定 schema + 32 例评测集——场景只是引擎的一层壳，不是四套代码。
- **server/ + web/：**FastAPI 瘦后端 (run_stage + SSE 实时 trace + 上传)；Next.js 前端 (对话流内联调查轨迹 + Evidence Board 证据面板 + Case 管理侧栏)。

反幻觉接地层（架构级设计，非一句 prompt）：接地铁律 → 强制取证 gate → submit_verdict 结构化终止 → AIS 来源对账四层纵深防御；实测在检索工具故障时 Agent 会诚实报告「无法核实」而非编

造内容。

产品的核心功能有哪些，是怎样实现这些功能的？

- **自主调查与主动证伪：** ReAct 循环中 Agent 自己规划查什么、查多深，路径由发现驱动（发现仿冒域名会主动扩大调查），撞死胡同由 Reflexion 反思绕路重试；强制取证 gate 保证「先取证后裁定」。
- **跨阶段记忆携带：** 同一 Case（求职机会）内，后续阶段自动携带早前阶段的已取证结论（裁定/关键事实/红旗/来源）——offer 证伪自动带着选岗调研的上下文跑，新裁定仍须独立取证核实。
- **对话内多能力路由：** 追问若明显属于其他阶段能力（如在 offer 证伪对话里问「顺便看下简历和 JD 差距」），两级路由（关键词门零成本快筛 + fast 模型单次确认）自动切换阶段能力作答，一个对话流覆盖全链路。
- **多模态输入：** 聊天截图 → 云端 VLM OCR 提取内容再展开调查；简历/offer letter PDF → read_pdf 文本提取；纯图片无文字也可发起调查。
- **全程可观测 + 引用溯源：** 每步调查（工具/查询词/耗时/结果）经 SSE 实时流式到前端时间线；答案中的引用与 Evidence Board 来源联动（点击引用跳转高亮对应来源），来源带「已验证」标注。

产品的未来规划是怎样的？

- **近期（赛后 1 个月）：** 以留学生/远程求职者社群（Reddit r/jobs、一亩三分地、Discord 求职社群、高校 career center）冷启动，主打「投 offer / 交押金前先证伪一次」，免费单次证伪引流。
- **产品化：** 账号体系 + 历史调查记忆（复用已建 LTM 层），从单次证伪升级为「求职季全程副驾」订阅；沉淀诈骗话术 / 山寨域名黑名单形成数据壁垒。
- **商业化：** 安全类工具付费意愿高于效率类；订阅制覆盖多次证伪 + 简历定向 + 选岗调研；B 端向留学中介 / 高校就业办输出批量核验服务。
- **能力外扩：** 同一核心引擎把「调研 + 证伪」复用到租房、投资、合作等高信息不对称的机会防坑场景。

您调用了哪些模型？分别承担什么任务？

模型 / API	调用场景	输入 → 输出	选择原因
GMI · deepseek-ai/DeepSeek-V4-Pro (strong 层，保留思考)	每阶段首步调查规划、 最终裁定等强推理环节	调查目标 + 已有 证据 → 下一步 计划 / 最终 Verdict	全部推理流量经 GMI 承载；strong 层的推理质量直接 决定证伪深度与裁 定可靠性

GMI · deepseek-ai/DeepSeek-V4-Flash (fast 层，关思考)	多步 tool-calling 执行、Reflexion 反思、Evaluator 评估、教训提取、追问意图路由确认	轨迹片段 → 下一动作 / 反思 / 评分 / 路由决策	成本敏感、复杂度较低的高频调用；分层路由节省约 60% token
GMI · moonshotai/Kimi-K2-Instruct-0905 (upgrade 层)	tool-call 备援：连续 2 步未发出工具调用时动态升级接管	同 fast 层上下文 → 可靠的 tool_calls	复杂 function schema 下的 tool-calling 可靠性兜底
GMI · google/gemini-3.1-flash-lite-preview / pro-preview (vision)	招聘方聊天截图、offer 图片 OCR 与理解（复杂/模糊图自动升级 pro)	图片 → 结构化文本	沟通/offer 阶段用户常粘截图，需多模态输入

经 `enable_thinking` 参数**分层控制思考**：Flash（fast 层）关思考，保证快、省与稳定 tool-calling；Pro（strong 层）保留思考，用于首步规划与最终裁定。这一方案来自真实调试：早期 GMI 思考协议存在多个坑（reasoning_content 不回传则 400、thinking 参数 422、reasoning-only 空响应），一度全部改用非思考 instruct 模型；实测确认 GMI 支持 `enable_thinking` 分层开关、且引擎已正确回传 reasoning_content（多轮 tool-calling 零 400）后，切换到能力更强的 DeepSeek-V4 系列。

在调用模型和模型使用这方面，您的链路设计是怎样的？

整条链路见下图：前端经FastAPI 进入 nexa_agent 的 ReAct+Reflexion 调查循环；**分层模型路由**按角色选模型（首步规划/最终裁定走 strong，多步执行/反思/评估走 fast，工具调用失灵时动态升级 upgrade、恢复后回落）；所有结论必须依次通过接地层与 Verifier 事实门控，调查全程以结构化 trace 事件经 SSE 实时回推前端时间线。

链路上的可靠性工程：

- LLM 调用对瞬时错误（连接/超时/5xx/429）指数退避重试；
- 观察结果分档截断防上下文溢出；跨步工具结果硬缓存去重；
- 登录墙域名提前拦截止损；SSE 20s 心跳防代理断流。

三、请提交产品的页面展示（至少 6 张）

以下为产品页面与功能展示。每个功能同时支持格式化表单与自由文本输入；支持多轮对话，一段对话内可连续完成多个功能，无需手动切换。

产品首页

实时trace卡片，展示调用工具

各功能效果展示如下，其中右侧 Evidence Board 证据面板：红旗 / 关键事实 / 编号来源，每条结论可点击 [n] 溯源。

Paste the recruiter's messages. I'll verify their identity and flag abnormal patterns. Keep pasting new messages as they arrive – I'll reason across the whole thread.

Hi! We saw your profile and want to offer you a remote data-entry job, \$35/hour...

Investigated in 9 steps · 7 searches · 1 page fetched

View steps +

Likely a Scam

This is almost certainly a scam – do not send any money or respond on Telegram. The recruiter claims to be from Anthropic but asks you to pay \$150 in USDT (crypto) for a "data-entry" job with no interview, communicating only via Telegram. Anthropic's own careers page explicitly warns that they never ask for money, only use @anthropic.com emails, and always conduct interviews. The role ("data-entry") doesn't even exist at Anthropic, a world-leading AI research company. All indicators point to an impersonation scam designed to steal your money.
⚠️ 7 risk signals: DEMAND FOR PRE-PAYMENT – The recruiter asks for a \$150 "onboarding/equipment deposit" before employment starts. Legitimate employers never charge candidates fees. CRYPTOCURRENCY PAYMENT – The deposit is demanded in USDT (Tether), an irreversible cryptocurrency. This is a classic scam tactic to avoid detection and chargeback...

SUGGESTED NEXT STEPS
1- Report this Telegram account (@hr_fastjobs) to LinkedIn and Telegram as a recruitment scam – the more reports, the harder it is for them to target others.
2- If you want, I can check any other recruiter messages you receive going forward – just paste them here.
3- Would you like me to search for any specific company's official careers page or recruitment channels so you have a verified reference for future outreach?
Ask a follow-up to dig into any point. (55s · 1 trial)

EVIDENCE BOARD

Verdicts, red flags and sources land here as the investigation runs.

X

Likely a Scam

大概率是坑

This is a textbook impersonation scam. The recruiter claiming to represent Anthropic for a remote data-entry job violates every single one of Anthropic's own official recruitment warnings, and the communication pattern matches all known red flags for job fraud.

Verified Facts · 7

Hide +

Anthropic's official careers page (anthropic.com/careers) explicitly states: "Anthropic recruiters only contact you from @anthropic.com email addresses" and "Legitimate Anthropic recruiters will never ask for money, fees, or banking information before your first day." Source: web_fetch(. Confidence: High. [www.anthropic.com](#)

The recruiter contacted via Telegram @hr_fastjobs with no company email – this directly contradicts Anthropic's stated practice of using only @anthropic.com email addresses. Source: User-provided recruiter info. Confidence: High.

The recruiter demands a \$150 USDT (cryptocurrency) deposit for "onboarding/equipment" – Anthropic explicitly states recruiters never ask for money or fees before the first day. Source: web_fetch(. Confidence: High. [www.anthropic.com](#)

The offer is for a "remote data-entry job" at \$35/hour with no interview. Anthropic is a world-leading AI research company (Claude LLM) that hires engineers, researchers, and policy professionals – not "data-entry" staff. The role doesn't exist at Anthropic. Source: Anthropic careers page lists no such role; company nature from Wikipedia. Confidence: High.

The offer includes "no interview needed" – Anthropic's careers page describes a multi-stage interview process for all roles. Source: web_fetch(. Confidence: High. [www.anthropic.com](#)

The recruiter demands payment via USDT (Tether, a cryptocurrency) – a payment method that is irreversible and untraceable, which is a hallmark of recruitment scams. Source: User-provided message. Confidence: High.

The recruiter's Telegram handle @hr_fastjobs does not correspond to any known Anthropic

Paste the offer or contract. I'll run the deepest cross-verification and return a verdict: Looks Legit, Suspicious, or Likely a Scam – with the evidence behind it.

Offer Letter – Nexora Global Solutions Ltd.
Position: Remote Financial Operation... HR: Telegram @nexora_hr only (no corporate email address provided)

Investigated in 36 steps · 23 searches · 8 pages fetched · 3 WHOIS lookups

View steps +

Likely a Scam

This offer is almost certainly a scam. I verified every angle: the company website (nexoraglobalsolutions.com) is just a GoDaddy placeholder page registered only 7 months ago; there is zero digital footprint for "Nexora Global Solutions Ltd." anywhere; and the offer uses a slightly wrong name to impersonate China Everbright Group (a real state-owned enterprise that hires through formal channels – not Telegram, not crypto). Every single element of this offer – no interview, \$9,200/month paid in USDT, a \$320 upfront "equipment kit" fee, Telegram-only contact, and a 24-hour deadline – is a textbook scam pattern. Please do not send any money or provide any personal documents.
0 facts verified · 12 sources – [see full evidence](#) →

Likely a Scam

大概率是坑

This is a near-certain scam. Nexora Global Solutions Ltd. doesn't exist as a real company – its website is a GoDaddy placeholder registered just 7 months ago. The offer impersonates China Everbright Group (a legitimate state-owned enterprise) with a slightly wrong name ("Everbright Holdings Group"). Multiple textbook scam red flags: no interview, \$9,200/month in crypto (USDT), \$320 upfront "equipment kit" fee, Telegram-only contact, 24-hour urgency.
